 - 4.5** Step 5 — Finish the Quality Order (Supervisor)
 - 4.6** Step 6 — Generate the PDF report
- 5. Troubleshooting & FAQ**
- 6. Glossary**

1. Overview

This short guide covers the two main jobs you do every day in Sharbatly QMS:

1. **The Arrival** — turn a container that SAP says has arrived into an inspection record: fill in the seal, temperatures and photos, then open a Quality Order.
2. **The Quality Order (QO)** — inspect samples from that container, record every defect and measurement, add photos, send it to a supervisor to Finish, and produce the printed **PDF report**.

The two jobs run one after the other: **an Arrival is completed first, and the Quality Order is opened from it**. Everything you inspect on the floor is recorded against the Quality Order.

Quick Start

New here? Do these four things in order and you've done the whole job: ① **pick your container from Pending** → ② **fill the checklist and Save** → ③ **Create Quality Order** → ④ **add your samples, then Submit for review**. The rest of this guide explains each step.

2. Getting started

2.1 Signing in

Steps

1. Open the app in your web browser: **http://192.168.3.17:5244**.
2. Type your **Username** and **Password** (the same ones you use to log in to your work computer).
3. Click **Sign in**.

👉 the home dashboard, with the top menu across the top of the page.

Tip

If you see "Invalid credentials", check the username is just your name (for example `ahmed.ali`) with no `@` and no domain in front. If it still won't let you in, ask an administrator to check your account.

3. The Arrival process

An **Arrival** is one container of fruit. You create it from the list of containers SAP has told the app about, fill in what you see at the cold store, and then open a Quality Order on it.

3.1 Step 1 — Pick your container from Pending

Steps

1. Click **Pending Containers** in the top menu.
2. Find your container in the list. If it isn't there yet, click **Retrieve latest containers** at the top — a small status line tells you when the fresh list has come back from SAP.
3. If the list is long, type the container number, BOL, or PO in the filter boxes to narrow it down.
4. Click the **row** of the container you want.

👉 the app creates the Arrival and opens its details page, with an empty checklist ready to fill in.

Tip

Each container becomes one Arrival. If you can't find a container, it usually just hasn't been fetched from SAP yet — click **Retrieve latest containers** and wait a few seconds.

3.2 Step 2 — Fill and save the container checklist

Hand over to Quality / Logistics?

YESNO

Logger active & data available?

YESNO

Save checklistSupervisor edit

Steps

1. On the Arrival details page, fill in the **seal number** and tick **Seal intact** if it was.
2. Tick **External damage** if there was any visible damage to the container.
3. Type the **discharge date** (the day the container was discharged) next to the arrival date.
4. Type the three **pulp temperatures** — front, middle and back.
5. If there is a **data logger**, type its serial number and tick the box to say its photo was taken.
6. Add a short **note** if anything is unusual.
7. Add photos with **Add photo** — you can drag a picture in, browse for a file, or take one with the camera.
8. Click **Save**.

👉 a green banner confirms the checklist saved. Your entries stay on the page.

Tip

You don't have to finish in one sitting. The checklist saves every time you click **Save**, so you can come back and add more later.

3.3 Step 3 — Complete the arrival and open a Quality Order

4. Data Logger Inspection

Locate and retrieve data logger?

YESNO

Hand over to Quality / Logistics?

YESNO

Logger active & data available?

YESNO

Save checklistSupervisor edit

Steps

1. When the checklist is complete, click **Complete** (or **Create Quality Order**) at the top of the Arrival.
2. Confirm if the app asks you to.

👉

a brand-new **Quality Order** opens, with the material lines already filled in from SAP. You're now ready to start inspecting — that's the next section.

Tip

A Quality Order can only be opened once the Arrival is **Completed**. If the button is greyed out, finish and Save the checklist first.

4. The Quality Order process

The **Quality Order (QO)** is where you record the inspection: one or more **samples**, the **defects** and **readings** on each, and the **photos**. When you're done you send it to a supervisor to **Finish**, and you can print the **PDF report**.

4.1 Step 1 — Add a sample

Bruising	-	0	+	0.0%
Crack	-	0	+	0.0%
Russetting	-	0	+	0.0%
Shrivelling	-	0	+	0.0%

Save sample

Steps

- On the Quality Order, click **Add sample**.
- Choose the **Sample scope** — **One Carton** or **Multi-Carton**.
- Check the **Sample size** — it fills in automatically from the material, but you can change it if you counted a different number.
- Fill in the sample details you have (grower, pallet, etc.) if your team records them.
- Click **Save sample**.

👉 the new sample appears on the Quality Order with its size and scope. You can now add the defects and readings for it.

Tip

Made a mistake? Open the sample, change the values and **Save** again. The first Save creates the sample; every Save after that updates it. You can delete a sample only while the Quality Order is still **Open**.

4.2 Step 2 — Record readings and defects

Sample #1

QO QO-2026-000001 — Material ORVAGGE694065CAF30 Orange Valencias Generic Egypt 6.5 KG

← Back to QO

Delete sample

Sample header

Sample Size (inspected qty)
30

Overridden — material default: 31

No sample-level header fields configured. Manage them (and their scope) in [Admin → Sample Headers](#).

READINGS

PUC %	PHC	Sticker	Gross Weight kg *
1.0000	1.0000	1	6.5000
Net Weight kg auto	Tara kg	Brix Bx *	Firmness lbs
5.50	1.0000		
Colour	Waxing	Downgrade %	Packaging Material
Green Soft / Destroy	Latex Measure	Yellow Ripe	Brix
			1.0000

Defects total: 8 / 30

MAJOR DEFECTS

MINOR DEFECTS

Waste / Decay	0	0.0%	Stem Injury	0	0.0%
Scald	0	0.0%	Bruising	0	0.0%
Bitter Pit / Plara	0	0.0%	Crack	0	0.0%
Lenticels Breakdown	0	0.0%	Russetting	0	0.0%
Anthracoise	0	0.0%	Shrivelling	0	0.0%

Save sample

Steps

1. Open the sample you want to record against.
2. Type the **readings** you measured — Brix, firmness and so on. The list only shows the readings that apply to this kind of fruit.
3. Type the **count** for each **defect** you found. Leave a defect at zero if you didn't see it.
4. Add **photos** of the defects — drag, browse, or use the camera. The photo count on the sample updates straight away.
5. Click **Save sample**.

👉 the sample's defect summary and photo count update on the Quality Order.

Warning

The total of all your defect counts on a sample can't be more than the sample size. If you hit the limit, the form tells you — recount or correct a number before saving.

4.3 Step 3 — Complete the material header

The screenshot shows the 'Quality Orders' section of the Sharbatly QMS interface. The top navigation bar includes links for Pending Containers, Arrivals, Quality Orders (active), Claims, Data hub, Parameters, and Admin. The user is logged in as AXUSER. The main header for the Quality Order 'QO-2026-000001' is displayed, with an 'Open' button and a timestamp 'created 6/20/2026 12:29:20 AM: by mohamed.tag'. Action buttons include 'Back', 'View arrival', 'Submit', and 'Download PDF report'. Below the header, a 'Shipment' section contains a table with details: Container (SZLU9510306), BOL (ADAJED1861792847), Vendor (Arabian Agricultural Comp -Aratco), PO (4700010676), Vessel (TRANSMAR LEGACY / 18617), Loading (AL ADABIYAH, EG), Sailing (2026-06-07), and Arrival (2026-06-18). Two sample entries are listed below, both for 'Orange Valencias Generic Egypt 6.5 KG' with a '1 sample' count. Each entry has buttons for 'Add sample', 'Material details', and 'Override size'.

Shipment			
Container: SZLU9510306	BOL: ADAJED1861792847	Vendor: Arabian Agricultural Comp -Aratco	PO: 4700010676
Vessel: TRANSMAR LEGACY / 18617	Loading: AL ADABIYAH, EG	Sailing: 2026-06-07	Arrival: 2026-06-18

Sample	Material	Weight	Count	Actions
> ORVAGGEG04065CAF30	Orange Valencias Generic Egypt	6.5 KG	1 sample	Add sample Material details Override size
> ORVAGGEG04065CAF36	Orange Valencias Generic Egypt	6.5 KG	1 sample	Add sample Material details Override size

Steps

1. Look at the **Material header** button on the Quality Order — it glows **yellow** until the header details are complete.
2. Click it and fill in the required header fields for the material.
3. Click **Save**.

👉 the button stops glowing once the header is complete. You need this done before you can submit.

4.4 Step 4 — Submit for review

> ORVAGGEG04065CAF36 Orange Valencias Generic Egypt 6.5 KG 1 sample

Add sample

Material details

Override size

Steps

1. Make sure every sample you meant to inspect is saved, and the **Material header** is complete.
2. Click **Submit for review** at the top of the Quality Order.
3. Type a short note to the supervisor if you'd like.
4. Click **Confirm**.

👉 the Quality Order status becomes **Submitted**. You can't edit the samples any more until the supervisor either Finishes it or sends it back to you.

Tip

If you try to submit before adding samples, the app warns you and asks you to confirm with a reason. That's there to stop empty orders going through by accident.

4.5 Step 5 — Finish the Quality Order (Supervisor)

Sharbatly QMS

Steps

1. Open a **Submitted** Quality Order.
2. Review every sample and the operator's note.
3. If everything is correct, click **Finish** — the Quality Order becomes **Closed**.
4. If something needs fixing, click **Cancel submission** — the order goes back to **Open** so the operator can correct it.

👉 once Finished, the order is **Closed** and the report buttons unlock.

4.6 Step 6 — Generate the PDF report

The screenshot shows the Sharbatly QMS interface. At the top, there's a navigation bar with links: Pending Containers, Arrivals, Quality Orders (active), Claims, Data hub, Parameters, and Admin. The user is logged in as SiteAdmin. The main header displays the Quality Order ID: QO-2026-000001, created on 6/20/2026 at 12:29:20 AM by mohamed.tag. Action buttons include Open, Back, View arrival, Submit, and Download PDF report. Below this, a 'Shipment' section contains details: Container: SZLU9510306, BOL: ADAJED1861792847, Vendor: Arabian Agricultural Comp -Aratco, PO: 4700010676, Vessel: TRANSMAR LEGACY / 18617, Loading: AL ADABIYAH, EG, Sailing: 2026-06-07, and Arrival: 2026-06-18. Two sample entries are listed: ORVAGGEG04065CAF30 and ORVAGGEG04065CAF36, both for Orange Valencias Generic Egypt 6.5 KG, each with a '1 sample' button and options to Add sample, Material details, or Override size.

Steps

1. Open the finished (Closed) Quality Order.
2. Click **Download PDF** (or **Quality Report**) at the top.
3. The report opens as a PDF — it shows the shipment details, the **Time Bar**, every sample with its readings and defects, and the photos.
4. Save or print it as you need.
5. To e-mail it to the supplier, click **Send report to supplier** instead — the message is pre-filled; edit it if you want and click **Send**.

👉 a professional PDF quality report you can save, print, or e-mail. A green banner confirms if you sent it to the supplier.

Tip

You can regenerate the PDF any time; it always reflects the latest saved data on the Quality Order.

5. Troubleshooting & FAQ

I can't find my container in Pending Containers.

The "Create Quality Order" button is greyed out.

The form won't let me save my defects.

I can't edit a sample any more.

The Material header button is glowing yellow.

How do I print the report?

6. Glossary

Arrival

one container of fruit, from the moment it arrives until its inspection is recorded.

Checklist

the seal, temperature, logger and photo record you fill in on the Arrival.

Quality Order (QO)

the inspection for an arrival: its samples, defects, readings and photos.

Sample

one inspected unit (a carton, or a set of cartons) within a Quality Order.

Reading

a measurement such as Brix or firmness.

Defect

a fault you count on a sample (for example bruising or decay).

Material header

the material-level details that must be completed before a Quality Order can be submitted.

Submitted

the state a Quality Order is in after an operator sends it for review; samples are locked.

Closed / Finished

the state after a supervisor accepts the Quality Order; the report can now be produced.

Time Bar

the number of days from the discharge (or arrival) date to the day the Quality Order was finished, shown on the report.
